We just raised ~\$5mn at a \$75mn valuation. Previous money raised has amounted to \$60mn into the parent, which got the technology to the current stage—although not all of that we to the ibuprofen and benfotiamine products.

Major investors from last round are:

1. private equity fund \$3mn
2. crossover fund \$1.25mn
3. 4-5 high net worth investors ~\$1mn

Board and management are on this link:

Adam,  
Thanks for the note and phone call. It won't work to meet this week, but I'll review the materials and should be back in touch shortly. Can you mention how much \$ the company has raised thus far, who the major investors are, who is on the board, the size and valuation at the most recent financing?
